

**Part A : Explanatory Notes Pursuant to FRS 134**

**A1. Basis of preparation**

The unaudited interim financial statements have been prepared under the historical cost convention unless otherwise indicated in the significant accounting policies and in accordance with the requirements of FRS 134: Interim Financial Reporting and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad.

These financial statements should be read in conjunction with the audited financial statements for the year ended 31 December 2013. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the year ended 31 December 2013.

The financial statements of the Group have been prepared in accordance with Financial Reporting Standards ("FRS"), generally accepted accounting principles and the Companies Act, 1965 in Malaysia.

**Part A : Explanatory Notes Pursuant to FRS 134 (Cont'd)**

**A2. Significant accounting policies (cont'd)**

FRS 10 introduces a new control model that focuses on whether the Group has power over an investee, exposure or rights to variable returns from its involvement with the investee and ability to use its power to affect those returns.

In accordance with the transitional provisions of FRS 10, the Group reassessed its control over its investees at 1 January 2013. As a consequence, the Group has changed its control conclusion in respect of its investment in The Naborough Plantations, Plc and Rivaknar Holdings Sdn. Bhd., which were previously accounted for as associates using the equity method. Although the Group owns less than half of the voting power of the investees, management has determined that the Group has had control over the investees, on a de facto power basis. It is impracticable to measure the investees' assets, liabilities and non-controlling interests in these previously unconsolidated investees on the date of initial application as if that investees had been consolidated from the date when the investor obtained control of that investee. Accordingly, in accordance with the provisions of FRS 10, the Group applied acquisition accounting to the investments at 1 January 2013, which is the beginning of the earliest period for which the FRS 3 is practicable (deemed acquisition date).

The impact of change of accounting policy is shown in the Statement of Changes in Equity.

At the date of authorisation of the financial statements, the following new FRSs, revised FRSs, Amendments to FRSs and IC Interpretations were issued but not yet effective and have not been applied by the Group and by the Company:

<b>FRS, Amendments to FRS and IC Interpretations</b>	<b>Effective for financial periods beginning on or after</b>
Amendment to FRS 10: Consolidated Financial Statements Investment Entities	1 January 2014
Amendments to FRS 12 : Disclosures of Interests in Other Entities : Investment Entities	1 January 2014
Amendments to FRS 127 : Separate Financial Statements : Investment Entities	1 January 2014
Amendments to FRS 132 : Financial Instruments: Presentation Offsetting Financial Assets and Financial Liabilities	1 January 2014
Amendments to FRS 136 : Recoverable Amount Disclosures for Non-Financial Assets	1 January 2014
Amendments to FRS 139 : Novation of Derivatives and Continuation of Hedge Accounting	1 January 2014
IC Interpretation 21 : Levies	1 January 2014
FRS 9 : Financial Instruments	1 January 2015

**Part A : Explanatory Notes Pursuant to FRS 134 (Cont'd)**

**A2. Significant accounting policies (cont'd)**

The directors expect that the adoption of the standards and interpretations above will have no material impact on the financial statements in the period of initial application, except as disclosed below:

**FRS 9 : Financial Instruments**

FRS 9 reflects the first phase of work on the replacement of FRS 139 and applies to classification and measurement of financial assets and financial liabilities as defined in FRS 139. The adoption of this first phase of FRS 9 will have an effect on the classification and measurement of the Group's financial assets but will potentially have no impact on classification and measurements of financial liabilities. The Group is in the process of making an assessment of the impact of adoption of FRS 9.

**Malaysian Financial Reporting Standards (MFRS Framework)**

On 19 November 2011, the Malaysian Accounting Standards Board (MASB) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards (MFRS Framework). The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012 and is to facilitate convergence with the International Financial Reporting Standards ["IFRS"]. Nevertheless, the Group and the Company are allowed by the MASB to defer the adoption of these new accounting standards to financial year ending 31 December 2015 as the Group and the Company are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15).

This would result in the Group and the Company preparing an opening MFRS statement of financial position as at 1 January 2014 which adjusts for differences between the classification and measurement bases in the existing FRS framework versus that in the new MFRS framework. This would also result in a restatement of the financial performance for the financial year ending 31 December 2014 in accordance with MFRS which would form the MFRS comparatives for the financial year ending 31 December 2015.

The impact on the financial position and performance of the Group and the Company have yet to be determined as the Group and the Company are in the process of assessing the financial effects of the differences between FRS and accounting standards under the MFRS Framework.

**A3. Comparatives**

There have been no material changes to the comparative figures.

In accordance with the transitions provided under FRS 10, retrospective adjustments are not made as the Group considers the deemed date of acquisition to be 1 January 2013, i.e., when this standard became effective.

**A4. Seasonal or cyclical factors**

Turnover is also dependent on price fluctuations of Crude Palm Oil ("CPO") which are not within the Company's control but are determined by the global supply and demand for edible oils.

Production of fresh fruits bunches of oil palms ("FFB") is affected by weather conditions, the age of the palms and seasonal biological stress.

The Group registered revenue of RM16.10 million for the current financial period, an increase of 44.13% compared to the preceding corresponding period.

The increase in revenue is due to the increase in the average selling price of fresh fruit bunches of palm oil ("FFB") and increased production compared to the preceding corresponding period. Details are as follows:

	<b>Cumulative 6 months ended</b>		<b>Variance</b>
	<b>30.06.14</b>	<b>30.06.13</b>	
Average FFB price per metric ton (RM)	583.70	477.83	22.16%
Production (MT)	<u>26,103.81</u>	<u>21,558.69</u>	<u>21.08%</u>

The Group also recorded a pre-tax profit for the current financial period of RM7.73 million against pre-tax profit of RM2.80 million, compared to the preceding corresponding period, an increase of 175.54%. The higher pre-tax profit is primarily due to higher revenue as well as a positive swing in the group foreign exchange position of RM0.40 million from an unrealised loss of RM0.18 million in the preceding corresponding period to an unrealised gain of RM0.25 million for the current financial period.

The Australian subsidiary is an investment holding real estate company that develops and rents out its properties. All properties owned by this company are fully tenanted as at 30 June 2014. The increase in profit is due to the full repayment of its term loan in the last financial quarter.

**Plantations**

The current quarter's recorded pre-tax profit of RM3.43 million on revenue of RM7.48 million as compared to pre-tax profit of RM4.00 million on revenue of RM7.76 million posted in the immediate preceding quarter. The decrease in the current quarter's revenue by RM0.28 million or 3.63% as compared to the preceding quarter is due to a combination of a decrease in the average selling price and decrease in production of FFB as follows:

	<b>3 months ended</b>		<b>Variance</b>
	<b>30.06.14</b>	<b>31.03.14</b>	
Average FFB price per metric ton (RM)	573.41	593.97	(3.46%)
Production (MT)	<u>13,040.80</u>	<u>13,063.01</u>	(0.17%)

**Real Estate Investment**

The slightly weaker revenue from the Australian subsidiary compared to the preceding quarter is primarily due to a stronger Ringgit against the Australian Dollar in the current quarter as compared to the preceding quarter.

The significantly higher profit in the current quarter is primarily due to the full repayment of the term loan in the preceding financial quarter.

**Part B : Explanatory notes pursuant to Appendix 9B of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad (Cont'd)**

**B3. Prospects**

The directors expect reasonable performance from the Group for the coming year as indicated in the prospects of the business divisions below:

The prospects are very much dependent on weather conditions, the global edible oil and its related markets, global economic conditions and how they impact production of FFB and CPO prices. Based on the current market trend and demand for CPO which augurs a favourable outlook for oil palm plantations, the Directors are optimistic that this division will be able to maintain its productivity and remain competitive.

Barring any unforeseen circumstances, the Directors expect this division to be profitable and its performance for the coming year to be satisfactory.
